*Abstract:* Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR Part 63, Subpart A), as well as for the specific requirements at 40 CFR Part 63, Subpart OOO. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

*Form Numbers:* None.

*Respondents/affected entities:* Facilities that manufacture amino/phenolic resins.

*Respondent's obligation to respond:* Mandatory (40 CFR Part 63 Subpart OOO).

*Estimated number of respondents:* 19 (total).

*Frequency of response:* Initially, occasionally, and semiannually.

*Total estimated burden:* 23,300 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$3,360,000 (per year), includes \$958,000 in either annualized capital/startup or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment increase in the total estimated burden and capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. This increase is due to a recent amendment to the standard. The 2014 amendment requires additional reporting, recordkeeping, and equipment monitoring requirements, resulting in an increase in burden and costs for the regulated universe.
